WEISER, IDAHO, MAY 9, 1895.

NEWS NOTES AND GOSSIPS.

We are delightfully lulled either on the delightful weather for the past week or, we fear, for a long spell, with Spring's soft and gladdened showers. Spring by day and nightingale by night sing sweet and melodious as of old, and we notice the cuckoo and hear all about above in Orchards and shade trees is full blown and half, very profuse and abundant, which seem to have come into action since we left off to report the weather. We are pleased and the people are pleased and the birds are pleased and we hope the farmers are as well pleased as we are, and that they are delighted at the prospect for future crops and a fair market.

Prune trees, apricots, and cherry trees are shaking or doing their best to shake off their rusty or ragged blossom condition, and as we can see plainly the young and immature fruit is left behind, we infer that the subject is other matters is equally in the hopes of the fruit growers.

Alonzo Moore Jenkins' course the world of thinkers. Two lectures Friday night and one last night, and all—determined to work in spite of—Frost, Hail and inexperienced hands, and some crops destroyed, Frost, from Alonzo's lectures seems to have serial result. St. Chris. Hibben, continues the medical and bear killed and many questions and friends and the contest of property. Three lectures, as we are informed of each he gives concerning as to little he expounds of any stirring to these questions a source to social. Supply he on. Mr. Jenkins of the science has power and been [illegible] and Mr. Hibben's lectures [illegible] and Mr. Hibben's lectures [illegible] and Mr. Hibben's lectures
