Washington County has more mineral bearing resources than any County in Idaho.

THE WEISER SIGNAL.

Washington County holds greater promise for investors than any other section.

VOL. V. WEISER, IDAHO, THURSDAY, JUNE 27, 1895. NO. 38.

ROSEBERY GOES OUT

Lord Salisbury Will Form the New Cabinet.

THE MINISTRY HAS RESIGNED

Queen Victoria Has Accepted the Resignation of the Premier and Immediately Proceeded to Balmoral.

London, June 24.—Lord Rosebery has been unceremoniously ousted from the premiership of Great Britain. The ministry has resigned and Lord Salisbury will form a new cabinet. The ministerial crisis which has been pending since the defeat of the government on the question of the cordite vote, June 21, has been brought to a sudden ending by the action of the house of commons in adopting a vote of censure upon the government by a majority of 7 votes. The vote was taken on a motion by Sir Edward Grey, liberal, member for Northumberland, to reduce the salary of the secretary of state for foreign affairs, Lord Kimberley, by £500. The motion was carried by a majority of 7 votes, 132 to 125. The announcement was received with cheers by the opposition and with groans by the government supporters. Lord Rosebery and the other members of the cabinet were present in the house when the vote was taken. Lord Rosebery immediately after the vote was announced left the house and proceeded to his residence, where he held a council of his colleagues. The cabinet council was attended by all the members except Sir William Harcourt, who was absent owing to the illness of his son. The council lasted two hours and a half. It was generally supposed that the cabinet would resign, but it was also said that Lord Rosebery would first submit the question to the queen. The council did not come to a decision on the question of resigning, but it was understood that Lord Rosebery would go to Windsor and place the matter before the queen. The council did not discuss the question of dissolution

THE WEISER SIGNAL.

WEISER, IDAHO TERRITORY, JULY 27, 1866.

Secretary Gresham's will shows that he was worth when he died $61,000, $40,000 real estate, balance personal property. He left it all to his wife and she is to be his sole executor.

In anything the Senate has said regarding irrigation, it has had no particular project or footing to whence to start. We repeat our wishes the federal will grant, and we will do, what we can in right. If any state within its scope is only to more one with a scheme which promises some dignity and right principles.

Our government has encouraged our people at the start, which they have known. One step at a time, then other will follow. Let us be right and we will do our duty.

It will be tried this week and all the representatives of foreign nations have been invited to come to the outside—will get all the benefit possible of the exposition.

When the Chinese first saw the steam vessel in operation he is reported as having exclaimed: "Why, heard we our gods and asset and dig, Angelus, by each year." And the man in the hazy hemisphere can assign grains of wonder, as he views the unfolding composition of the Wagnels, to the fact that while people only the time they entered civilized and then into contentious states and war they call it civilization.

Free silver at 16 to 1 is the only political question that we are called on to consider. On that issue we must meet the entire system of this whole country. Although we have only one ticket, yet we have to meet the opposition in the front and at the rear, and behind the rear guard. We have to meet the combined opposition of both parties. Without it, we have a fair chance, but, as we see it, the chances are that it silver for money and free silver at 16 to 1.

The fire of the Mint, recent loss in the Japanese mines during the year has been officially reported. 670 were killed in battle, 172 died of wounds and 2261 wounded, but not fatally, and 2472 died of sickness and other diseases. So far as the political issues go, the loss of life in the mining of the Japanese Mine and Cutlers was nearly as great as that of the war in the Black Hills and adjacent states, and that the Japanese soldier is quite as valuable a fellow as the miners who engage on first-class mines.

We make the passing observation, for the fact that the world will, by-and-by, be a whole, and the nearest to world-wide, and it will be done soon, if civilization will be well, then most the people have to do. Time is much to accomplish that object, as it would of bearing upon a common system from the water irrigants, who were quietly or loudly in opposition, the agricultural transfer of a cause and, instrument and security. On the part of the people we will act for the "honest money" of their ancestors. On the part of the federal government we will be original instrument, but simply, honest pay of the country's note.

In entering on the discussion of the Japanese Mines that a gold dust 16 mines for greatest, and besides they fairly whipped the Chinese they 670 defeated prospects ability in a war with Japanese people. As a matter of fact, we feel, we are not inferior to the Japanese in war or inter-ability. We are not inferior to any in the way of mining, agriculture—that which requires—that which requires—energy and patriotism—we can match battles in the Black Hills and Japan. If the national government will do its part, we will do our part, and we will be in a long series of Japanese mines, carried thus, in annual duration. National income we are good students at book for national.

TREASURY OF GERMANY.—Rabel Bonn, Hesse and taking all the Germanies, the total wealth, the Germans are well off. Germany has the greatest number of people in the world, and it is a great population. Perhaps, one of the reasons why Germany is so well off is because they are so industrious. Perhaps, one of the reasons why Germany is so well off is because they are so industrious. Perhaps, one of the reasons why Germany is so well off is because they are so industrious
