

THE WEEKLY LEADER

HANDBOOK, FEBRUARY 20, 1894. The message of Governor Whitcomb to the legislature is pronounced by all to be an able document, containing many learned and timely suggestions.

Alaska

The Census (New) Index has been received with a copy of the report of Governor Klitshead of Alaska, on the wants and resources of that Territory, and has the following regarding it:

"It was a very striking in his report which is of remarkable interest—especially when we reflect that Governor Klitshead has been familiar with our Northwest since he witnessed the landing of the Russian flag and the hoisting of the Stars and Stripes at the commencement of what is called Governor Klitshead's report.

Postmaster General Hatten makes the excellent recommendation that the quit weight for letter postage be increased from half an ounce to an ounce. Less than six letters out of a hundred weigh more than half an ounce, so the change recommended would make but little decrease in the revenue. For the public, the change is also a benefit. People do not like to waste postage stamps and are subjected to no end of bother to see that their letters do not over-run in weight.
