

How to be Healthy in Winter

...the most common cause of illness in winter is the cold. It is caused by a germ which enters the body through the nose or throat. The germ then travels to the lungs and causes inflammation. This is the beginning of a cold or influenza. To prevent this, it is necessary to keep the body warm and to avoid exposure to cold winds. It is also necessary to keep the throat clean and to avoid contact with persons who are ill.
