

Rheumatism
 At a certain point, when the pain is unbearable, the patient should be taken to the hospital. It is a common mistake to think that the pain will go away if the patient is left alone. The pain is a signal that the disease is progressing and that the patient needs medical attention.

Encephalitis
 This is a serious disease of the brain. It is caused by a virus and can lead to death. The symptoms include fever, headache, and confusion. It is important to seek medical attention as soon as possible.

Dr. Williams' Pink Pills for Pale People
 This medicine is known for its ability to improve blood circulation and overall health. It is particularly effective for people who are pale and weak.
