Wanted—An Idea

The Danger

we have to tell you about a poison in a mild form, to be sure—but poison just the same. You drink more and more of it every year.

Poison in tea; poison to color tea with. Most all Japan tea is colored. We know of no Japan tea sold in the United States that is not—except *Schilling's Best.*

Would you like to know enough about tea to be sure that you are pouring health, not disease, into your stomach? Or do you think it wise to take care of the outer man and let the inner man shift for himself?
