**UNPROFITABLE FEEDING**

It is a common mistake to think that a horse will eat anything and that it will get the most out of it. It is not so. A horse will only eat what it needs and what it likes. If you feed him more than he needs, he will get fat and his feed will be wasted. If you feed him less than he needs, he will get thin and his feed will be wasted. The key is to feed him just what he needs and what he likes.
