

**DIET WORK**  
The diet is the most important factor in the maintenance of health. It is the foundation upon which the body is built. A diet that is rich in vitamins and minerals is essential for the body to function properly. The diet should be varied and balanced, and should include a wide variety of fruits, vegetables, and grains. The diet should also be low in fat and sugar, and should be eaten in moderation. The diet should be adjusted to the individual's needs and desires. The diet should be a source of pleasure and enjoyment, and should be a part of the individual's life.

**THE ELEPHANT'S TRUNK**  
The elephant's trunk is a remarkable organ. It is used for a wide variety of purposes, including drinking, eating, and touching. The trunk is made of muscle and skin, and is covered in small hairs. It is the most flexible part of the elephant's body, and can be used to pick up small objects and to hold large ones. The trunk is also used for communication, and can be used to touch another elephant's trunk. The trunk is a vital part of the elephant's life, and is essential for its survival.

**MATS HAVE FIVE HOSES**  
The mats have five hoses. They are used for a variety of purposes, including cleaning and maintenance. The hoses are made of a special material, and are designed to be flexible and durable. They are used to clean the mats, and to remove any dirt or debris. The hoses are also used for maintenance, and to ensure that the mats are in good condition. The hoses are a vital part of the mats, and are essential for their proper use.

**THE BIRD'S EYE**  
The bird's eye is a remarkable organ. It is used for a wide variety of purposes, including seeing and hunting. The eye is made of a special material, and is designed to be sharp and clear. It is used to see the world around the bird, and to identify its prey. The eye is also used for communication, and can be used to signal other birds. The eye is a vital part of the bird's life, and is essential for its survival.

**THE FISH'S GILL**  
The fish's gill is a remarkable organ. It is used for a wide variety of purposes, including breathing and filtering. The gill is made of a special material, and is designed to be efficient and effective. It is used to breathe the water, and to filter out any impurities. The gill is also used for communication, and can be used to signal other fish. The gill is a vital part of the fish's life, and is essential for its survival.

**THE INSECT'S ANTENNA**  
The insect's antenna is a remarkable organ. It is used for a wide variety of purposes, including sensing and communication. The antenna is made of a special material, and is designed to be sensitive and accurate. It is used to sense the world around the insect, and to identify its environment. The antenna is also used for communication, and can be used to signal other insects. The antenna is a vital part of the insect's life, and is essential for its survival.

**THE HOUSE**—The House of Representatives today passed a bill to amend the Federal Reserve Act, which would give the Federal Reserve Board the power to issue currency in the form of gold certificates.

The bill, introduced by Representative [Name], was passed by a vote of 342 to 100. It is expected that the Senate will pass a similar bill in the near future.

The bill would allow the Federal Reserve Board to issue gold certificates in denominations of \$100, \$50, and \$20. The certificates would be redeemable in gold at the discretion of the board.

The bill also would give the board the power to issue gold certificates in denominations of \$10 and \$5, but only in the case of a national emergency.

The bill is expected to be signed into law by the President in the next few days.

**THE SENATE**—The Senate today passed a bill to amend the Federal Reserve Act, which would give the Federal Reserve Board the power to issue currency in the form of gold certificates.

The bill, introduced by Senator [Name], was passed by a vote of 78 to 18. It is expected that the House will pass a similar bill in the near future.

**An Open Letter to the Public**

THE buying public has a distinct interest, whether or not a merchant advertises. It is to your interest, Mrs. Consumer, whether or not your merchant tells you by advertisement of his wares for—it is an economic truth that only the merchant who advertises can afford to make price concessions that are really competitive, to do business on the smallest per sale profit.

The merchant who does not advertise is necessarily content with small sales, therefore must make a large per sale profit.

Again—the very fact that your merchant advertises is a guarantee that his goods are moving every day, therefore you are assured of good goods and fresh goods. No merchant can afford to advertise for your inspection, sales or shoddy goods. Your pocketbook, your satisfaction, your every interest demands that you merchant be a good advertiser.
